KAPPA ADVENTURE RANGE

K-LAB is the place where Kappa tests and analyses its products, taking them to the limit, seeking valuable information to improve, innovate, rethink and always suggest new solutions.

K-LAB is the place where Kappa tests and analyses its products, taking them to the limit, seeking valuable information to improve, innovate, rethink and always suggest new solutions.

Thanks to 50 years of experience and expertise, we have the capability to provide the best in both comfort and safety.

→ K-LAB

The passion, the attention to detail, and the precision that our team adopts in the creation of every single Kappa product is precisely the same procedure that a biker would adopt when choosing the finest accessories and products for their motorcycle. K-LAB is the place where Kappa tests and analyses its products, taking them to the limit, seeking valuable information to improve, innovate, rethink and always suggest new solutions. The combination between K-LAB, with its modern crash test equipment, and the co-operation of external labs, equipped with optical benches and spectrophotometers for the control of the homologation of the visors, enables Kappa to play a prominent role in the arena of research and the avant-garde world of security and comfort on two wheels. Engineers and technicians analyse every driving situation, in every weather condition, for every kind of impact on a helmet, in order to obtain a level of absolute safety on the end product. Young testers live the city, connecting their smart phones, filling and emptying their hard bags commuting to their places of study or work and having used and tested our products in their daily life, the products are returned to our lab where feedback and suggestions regarding the products are given to the Kappa Engineers with a view to further improving existing products and developing new ones.

SUZUKI DL1000 V-STROM (14 → 15)

ACCESSORIES

- 01_ KRA3105 Specific rear rack in aluminium for MONOKEY® top case
- 02_ KLR3105 Specific rapid release side case holder for MONOKEY® cases
